

```
if coffee is available
    get coffee
else
    get tea
```

plain english
logic.

✓ Challenge-2

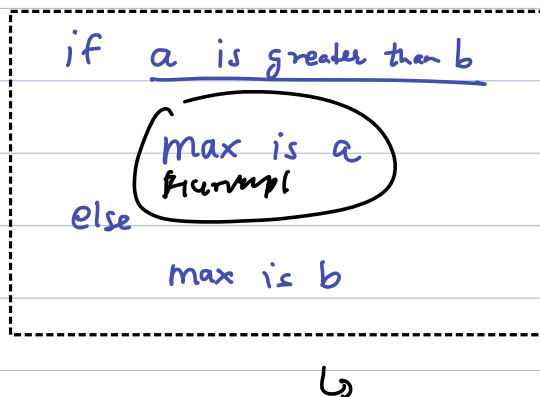

Given 2 nums as input from the user, print the max. of the two.

$a = 5$

$b = 3$

$a = 5$

$b = 6$

Pseudo Code

Not the actual
Python code.

Challenge-3

Given a number 'a' check if it is +ve or -ve or zero.

Input:

a = 5

a = -3

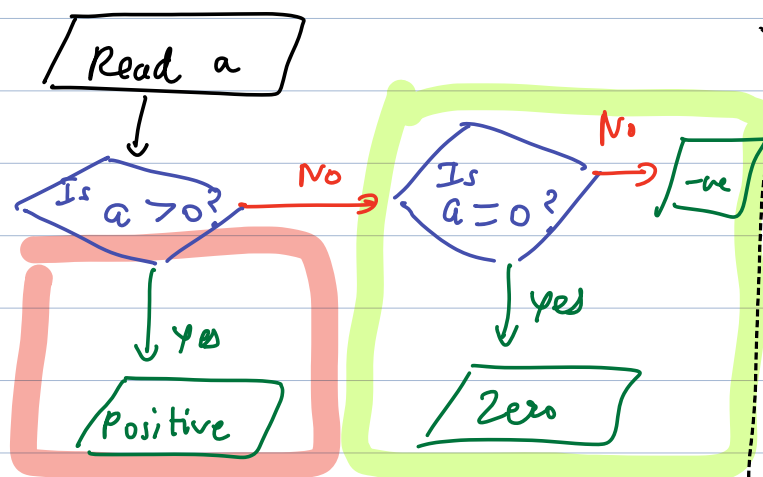

a = 0

Output:

Positive

Negative

Zero.

if a is greater than 0
a is +ve

else

if a is equal to 0
a is zero
else
a is -ve.

Flowchart

Plain English Code.

(PseudoCode)

Nested
if else.

```
if a is greater than 0
    a is +ve
else if a is equal to 0
    a is zero
else
    a is -ve
```

More than one conditions
checking 1 after other
& making the decision.

PseudoCode

If else if ladder

Weather is

Raining → Umbrella

Snowing → Raincoat / heavy blanket

Sunny → Sunglasses

Cloudy → Umbrella

Winter → Coat

Windy → Windcheater

```
if weather is raining
    Take an umbrella
else if weather is windy
    Take a windbreaker
else if weather is sunny
    Take sunglasses
/
/
else
    Just Go.
```

```
if Condition 1 :
    [ ]
elif Condition 2 :
    [ ]
else :
    [ ]
```

Doubts

In 1 Ram
 Shyam

Out 1 Ram says hi to Shyam

In 2 Sahil
 Sachin

Sahil says hi to Sachin
